

Evaluation - Residential - Single Family

Requested By: Client's Name Institution: Individual Request Date: 4/1/2025

Evaluation ID: BTJbcqhp2NZNIzmUAJGZ

Author: Nick Eiting

665 44th Ave SW, Vero Beach, FL

Intended user: Individual/Bank

Effective date: 4/1/2025 Report date: 4/7/2025

Inspection: A third-party contractor took photos of the subject property on April 1, 2025, which

the author later reviewed for this report.

EXECUTIVE SUMMARY

Subject Information

Property Type: Residential - Single Family

Address: 665 44th Ave SW, Vero Beach, FL 32968

Parcel ID(s): 82229

Legal Description: ARBOR TRACE PHASE I PD LOT 94 PBI 16-1

Assessment: \$561,453 (2024)

Site area: 0.29 acres
Building SF: 3,451 SF

Year built: 2002

Residential Style: 2 Story - Site Built (1 living unit)

Subject zoning: Residential

Flood info: Flood Zone(s): AE (FEMA Panel 12061C0358H)

The subject is in a residential part of Vero Beach, FL. Recently, property values in the area have

been stable.

Sale History: No sales in the past 3 years

Current Listing: None Offer to Purchase: None

Subject source(s): assessor records and general research

The subject is a residential property located in Vero Beach, FL. The search for comparable sales focused on similar properties in the subject's area that sold in the past twelve months. When considering the comparable properties, we first applied a time adjustment of 2% per year, to account for changing values since the time of each comparables' sale. Then, we adjusted each comparable for various traits relative to the subject. Key adjustments included site size, year built, living area square footage, bedrooms, bathrooms and parking features. After adjustments, the comparable sales range in value from \$703,000 - \$723,000, which we reconciled to a market value indication of \$711,000.

VALUE CONCLUSION

This report considers the market value of the subject property as of the effective date of the report (the "as is" value on 4/1/2025). "MARKET VALUE" means the most probable price which a property should bring in a competitive and open market under all conditions requisite to a fair sale, the buyer and seller each acting prudently and knowledgeably, and assuming the price is not affected by undue stimulus. Implicit in this definition is the consummation of a sale as of a specified date and the passing of title from seller to buyer under conditions whereby:

- 1. Buyer and seller are typically motivated;
- 2. Both parties are well informed or well advised, and acting in what they consider their own best interests;
- 3. A reasonable time is allowed for exposure in the open market;
- 4. Payment is made in terms of cash in U.S. dollars or in terms of financial arrangements comparable thereto; and
- 5. The price represents the normal consideration for the property sold unaffected by special or creative financing or sales concessions granted by anyone associated with the sale.

Source: 12 CFR § 34.42(h) (2022)

There are three general approaches that are typically considered during the valuation process: the Sales Comparison Approach, the Income Approach, and the Cost Approach. Akrivis includes a Sales Comparison Approach with all of our standard valuation reports, and may include additional valuation approaches or other supplemental analyses at the request of the client or the discretion of the report's author. Our concluded opinion of value is based on the indications of these analyses.

ANNOTATIONS

This report is an evaluation, it is not an appraisal. This report is, to the best of our knowledge, compliant with the regulatory requirements for evaluation development and evaluation content originally issued as the 'Interagency Appraisal and Evaluation Guidelines' on December 10, 2010 (75 FR 237, p. 77450-77473), and further detailed in interagency publications from March 4, 2016, and October 16, 2018, under the authority of Title IX of the *Financial Institutions Reform, Recovery, and Enforcement Act of 1989* (FIRREA). Our opinions and conclusions set forth herein are limited to the use of our client (Individual). This report contains only brief discussions or statements of the data and analysis used to estimate the market value of the subject property. The scope of the assignment and report content is specific to the needs of the client and for their intended use only. Akrivis is not responsible for unauthorized use of this report.

After the evaluation request receipt, Akrivis will dispatch and take a new picture of the subject property (provided it can be done without violating any law), unless the client has indicated that an inspection is unnecessary because a third party image of the subject (e.g., an assessor's photo) is sufficient to determine the subject's condition. An interior inspection will be conducted upon the client's request. The client will need to obtain the necessary permission for Akrivis to view the interior. Unless an interior inspection is specifically arranged between the parties, Akrivis will not consider any conditions affecting the subject property which are not externally visible and apparent from the exterior of the subject property, under the assumption that the interior of the property is in similar condition to the exterior. Accordingly, the subject property may be affected by conditions or other physical hazards that are not known to or considered by Akrivis.

Three generally accepted approaches to value are usually considered:

- A Sales Comparison Approach is utilized and developed to derive a probable estimate of market value for the subject property because similar sales can be utilized in the market.
- The Income Approach was considered but was not necessary or applicable in this instance because of the difficulty in estimating stabilized net income.
- The Cost Approach was not requested for this evaluation.
- In instances where multiple approaches are employed, Akrivis will consider all approaches performed and will reconcile to a final suggested property value for the subject.

Along with an inspection, Akrivis will utilize large commercial databases of comparable real property sales and other data from sources, all of which Akrivis reasonably believes to be reliable. However, no responsibility is assumed for the accuracy of any information supplied by third parties. Location, property condition, construction quality and building square footage will be researched and analyzed. All information will be verified with public records when possible or third-party sources deemed to be reliable.

There are some assumptions and limited conditions for this report. The records from the tax assessor's office may not be accurate, current, fully detailed, or complete. There may be other governmental or public records other than the tax assessor's office with relevant information which were not known to nor used by Akrivis unless specifically referenced in this report. Akrivis has not obtained nor reviewed a survey, title report, engineering report, natural hazard report or other similar information regarding the subject Property. The subject is assumed to be compliant with relevant zoning regulations – if the subject's specific

zoning designation is not available, Akrivis may assume a general zoning designation. Unless stated otherwise, Akrivis projects that the subject's future use will be the same as its current use.
